

MUN Speak

Points of Information =

Chair: Delegates, please come to order. This forum is now in session.

Chair: The chair will now call upon the main submitter to read the operative clauses.

Chair: Is the delegate open to points of information?

Delegate: The delegate would like to yield the floor to another delegate, if that is in order.

Chair: Yes, that is in order.

Delegate: The delegate of *France* will open himself up to any and all points of information.

Chair: Due to time constraints, the chair will entertain only two points of information. Delegates with a point of information, please raise your placards.

Chair: *France*, you have been recognized. Please rise and state your point.

Delegate: Is the delegate not aware that this clause as written is insufficient?

Delegate: Please rephrase your question.

Delegate: Motion to move directly into voting procedure.

Chair: There has been a motion to move directly into voting procedure. Are there any objections?

Chair: We will now move into voting procedure. Note passing will be suspended during this time. All delegates must vote for, against, or abstain from voting for this clause.

English Translation

Questions

Chair: Everyone be quiet, it is time to start now.

Chair: Main submitter, please come to the front and read your operative clauses.

Chair: Can the other delegates ask you questions now?

Delegate: I actually want to let someone else speak, is that okay?

Chair: Yes, that is okay.

Delegate: I'll answer any questions now.

Chair: There isn't enough time to answer all your questions. Only two more questions can be asked. Does anyone want to ask one?

Chair: *France*, you can ask your question.

Delegate: This clause isn't detailed enough.

Delegate: (either you don't understand or you need time to think of an answer).

Delegate: Let's vote already.

Chair: Someone wants to start voting, does anyone NOT want to vote now?

Chair: We are voting now. No more note passing. You have to vote for or against this clause. If you don't care, you can abstain.
